

The Early Career Hallucinations Research Group - Second Annual Meeting

The Palatine Centre, Durham University

Morning

9.30 – 12.30, September 10th, 2019

09.30 Coffee and Registration, Room 054

9.45 Welcome

Event Coordinator Catherine Bortolon (University Grenoble-Alpes)
ECHR co-founder Ben Alderson-Day (Durham University)

10.00 Research Presentations Session 1, Room 054

Chair: Imogen Bell (Swinburne University of Technology)

Rachel Brand (Swinburne University of Technology): *"A Pilot Trial of Trauma-Focused Imaginal Exposure for Auditory Hallucinations: Feasibility, Acceptability and Potential Effects."*
Clara Humpston (University of Birmingham): *"Bodily & multimodal hallucinations - an ICHR Working Group "*
Peter Wilson (NHS Foundation Trust and Health Education North West): *"Has our understanding of the psychopathology of psychosis advanced since the mid 20th Century, and if so, can we translate this into patient benefit?"*
Viktor Dlugunovych (Walden University): *"The Mental Health Component of Correctional Healthcare Services in the US"*
Emma Palmer-Cooper (University of Southampton): *"Hallucination proneness and online video watching in healthy adults"*

10.00 Research Presentations Session 1, Room 050

Chair: Stephanie Allan (University of Glasgow)

Clément Dondé (University Lyon 1): *"Bimodal distribution of tone-matching deficits indicates discrete pathophysiological entities within the syndrome of schizophrenia"*
Martin E. Fortier (Institut Jean Nicod): *"Studying the correlation between the neuropharmacology and phenomenology of hallucinations: theoretical and diagnostic implications"*
Joe Barnby (King's College London): *"Toward a neurocognitive process of paranoia"*
Zoë Haime (University College London): *"Do sedative and tranquilising medications affect social cognition?"*
Abigail Wright (Harvard Medical School): *"The impact of childhood trauma and emotional reactivity on psychotic experiences in college students"*

11.15 15 min Break, Room 058

11.30 Research Presentations Session 2, Room 054

Chair: David Benrimoh (McGill University)

Eugene Philalithis (University of Edinburgh): *"Groundless: Hallucination, interpretation, and joint language use."*
Pavo Orepic (Swiss Federal Institute of Technology): *"Sensorimotor conflicts related to somatic passivity experiences louden quiet voices in healthy listeners"*
Ana P. T. Pinheiro (University of Lisbon): *"Voice-Selective Prediction Abnormalities on the Psychosis Continuum"*
Marieke Begemann (University Medical Center Groningen): *"Antipsychotic medication use in first-episode psychosis – to continue or not to continue? The HAMLETT study"*

11.30 Research Presentations Session 2, Room 050

Chair: Rachel Brand (Swinburne University of Technology)

Sanne G. Brederoo (University of Groningen) *"Imagery vividness and imagery control as predisposition factors in hallucination-proneness in the visual and auditory perception domains: A pilot-study"*
Collen Rollins (University of Cambridge): *"Evidence for a structural reality monitoring network involved in hallucinations in schizophrenia"*
Alyssa Jongeneel (Amsterdam Public Health research institute): *"A time-series network approach to auditory verbal hallucinations: examining dynamic interactions using experience sampling methodology"*
Jamie Moffatt (University of Sussex): *"Induced anomalous experiences: relations with interoception, metacognition and anomalous experiences that occur in daily life in a non-clinical population."*

The Early Career Hallucinations Research Group - Second Annual Meeting

The Palatine Centre, Durham University

Afternoon 12.30 – 18.00, September 10th, 2019

12.30 Lunch Break, Room 058

13.30 Open Space Session, Room 054

With Mary Robson (Durham University)

This session is an opportunity to engage in learning, listening, and discussions around topics that interest you. Below you can find some topics that have been proposed by some ECHR members:

- Psychosis continuum: Does a psychosis continuum exist?
- Applying for funds, writing and publishing hallucination research?
- Clinical implications of hallucination research.
- Hallucinations and signal detection paradigms.
- Biological Basis for voice hearing and potential epigenetic changes.
- Multimodal hallucinations.
- Alterations in voice/language perception in AVH.

If you have any other topic you would like to discuss, please email us. You can also propose a topic during the session.

15.00 Keynote Speaker, Room 054

Iris Sommer (University Medical Center Utrecht): "Hallucinations are ubiquitous"

16.00 15 min Break, Room 058

16.15 Coding Session, Room 054

David Benrimoh (McGill University): *Stories from Codeland - Experiences in learning to use code for good science*

Session on coding, code management, and why code (isn't) scary.

17.15 Short Keynote Speaker, Room 054

Tanya Luhrmann (Stanford University): "The Voice of God"

17.45 Closing Remarks, Room 054

19.30 Dinner

Zizzi – Italian Restaurant

43-44 Saddler St, Durham DH1 3NU
